

CRADICK RETAIL LLP – COVID-19 & BUSINESS CONTINUITY

Cradick Retail are using all measures at our disposal to maintain continuity of service. Our priority is to safeguard the health of our colleagues and their families, clients and contacts and we have put in place procedures following the guidance issued from the government, health authorities and experts. We are constantly monitoring and developing these measures in the continually changing circumstances.

Our Managing Partners took the decision that as of Tuesday 17th March, all staff were to work from home. Therefore, our offices at Tunbridge Wells and Brighton will be closed until further notice.

All members of staff are contactable and equipped to work from home with access to information they would routinely have access to whilst in the office. We are confident that working from home will enable us to maintain our current level of business with little or no noticeable effect to our clients or contacts.

We have software in place to allow us to video or telephone conference and we can communicate internally via our various messaging systems.

All employees of the Partnership have reacted quickly and positively to our changing circumstances and we are convinced that we can maintain a normal level of service. Should you have any questions, do not hesitate to contact anyone of them on their normal numbers.

The Managing Partners will continue to monitor the situation and ensure our clients and contacts are aware of any future changes. We will also ensure everyone associated with the Partnership manage their exposure to COVID-19 and takes the care they need.
